

EHPA Membership Application Form

Thank you for your interest in joining the European Heat Pump Association (EHPA)!

EHPA welcomes organisations active in the heat pump sector, including manufacturers, research bodies, energy companies, consultancies, financial partners, and associations. By becoming a member, you support the growth of the European heat pump industry and contribute to shaping its future.

Before you start

Please consult the [EHPA Articles of Association](#) and the [EHPA Membership Terms and Conditions](#).

Completing this application form takes around 20-30 minutes. You can review and change your answers at any point before submitting the form. **Please note that your progress is saved within the same browser and device.**

Please prepare:

- Basic organisation details
- A short description of your activities and motivation for applying
- Your logo and relevant online presence (e.g. website, LinkedIn)
- Contact person details
- If applicable: a recent financial statement (e.g. year-to-date or latest available accounts) to support your declared turnover related to heat pump activities

If you are unsure which membership type or category applies to you, please contact us at membership@ehpa.org.

What happens next?

Your application will be reviewed by the EHPA Board. We will inform you of the outcome, and, if approved:

- Your membership invoice will be issued (we will contact you beforehand to see if a purchase order (PO) is required);
- You will be guided through the onboarding process;
- You will receive access to the EHPA members-only area.

For any questions, please contact membership@ehpa.org.

Membership type

* 44. Applicable membership type

Please select the membership type that applies to your organisation.

Full member

All organisations legally constituted in Europe, including, but not limited to, national and regional associations, utilities, manufactures, research institutes, energy efficiency agencies and networks and international organisations may become Full Members of the association. The scope of Europe, for the purpose of these Articles of Association, is defined by the countries of the Council of Europe. Full Members shall have voting rights at the General Assembly and may nominate candidates for election to the Board of Directors.

Associate member

Organisations legally constituted outside Europe can take part in the Association's activities as Observers or Sponsors upon agreement of the Board of Directors. Associate Members will be part of the association's mailing list and will have access to all information publicly available. They can attend the association's events. Associate Members shall have no voting rights at the General Assembly or within any corporate body of the association.

Annual membership fees

Applicable to all members in 2026. We consider the annual turnover linked to heat pump activities in Europe.

* 45. Membership category

Select the membership category that applies to your organisation.

- Commercial enterprise (COM)**
Companies that manufacture heat pumps, subsystems and components and place them on the market. Companies that place heat pumps on the market as their core business, including by providing heat as a service or heat pump based services to business and end consumers. These services include, but are not limited to, consultation, design, installation, repair, distribution, optimisation of heat pump systems for heating, cooling, and hot water purposes and ongoing support tailored to the specific needs of clients (B2B and B2C).
- Start-ups (START)**
Start-ups are commercial enterprises with fewer than 50 employees and an annual turnover from heat pump-related activities of less than EUR 1 million. Start-ups benefit from a reduced entry membership fee for a maximum duration of two years. After this period, or once they exceed these thresholds, they are reclassified under the Commercial Enterprise category.
- Utilities**
Organisations engaged in the commercial supply of heat and/or electricity to end consumers, including residential, commercial, and industrial customers.
- EU interest groups & National Heat Pump Associations**
Organisations representing the interests of heat pump manufacturers, suppliers, and related stakeholders at the European or national level. These groups promote the adoption, development, and policy support of heat pump technologies and act as a collective voice for their members within regulatory, technical, and market frameworks.
- Non-profit organisations (research institutes, universities, governmental organisations)**
Entities engaged in research, education, policy development, or public interest activities related to heat pumps and sustainable heating and cooling solutions. This category includes academic institutions, governmental bodies, and non-profit organisations dedicated to advancing knowledge, innovation, and deployment of heat pump technologies for environmental and societal benefits.
